

# The LEGO Group is working to make its **packaging sustainable by 2025**

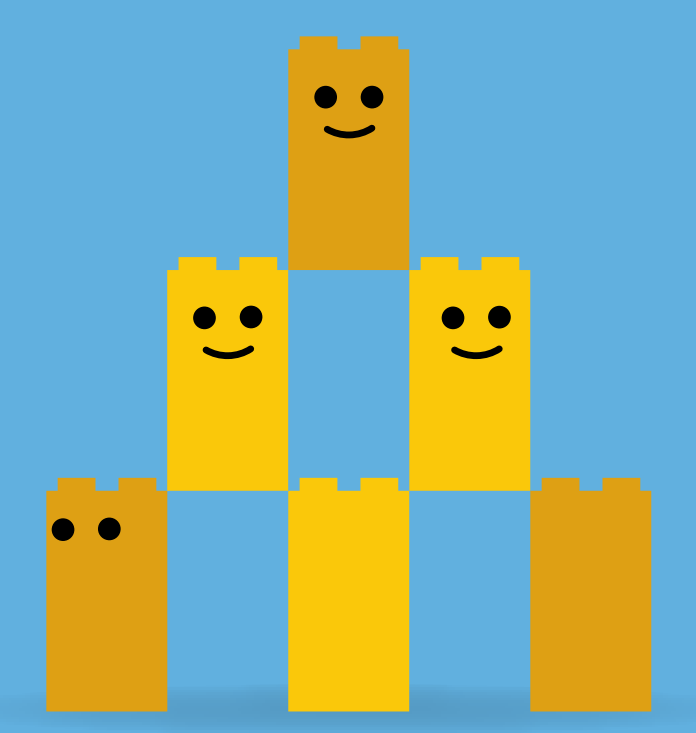

Recyclable paper bags will be trialled in LEGO® boxes from **2021**

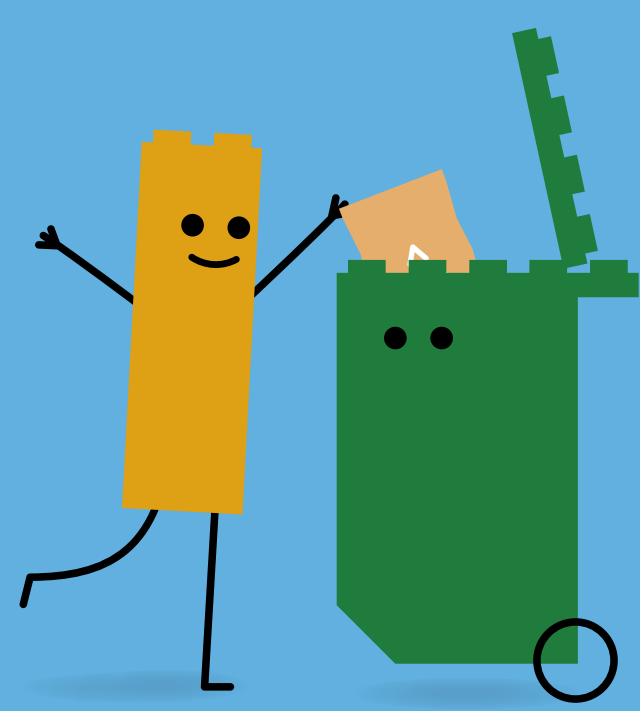

Trial bags made from from **sustainably sourced paper** certified by the Forest Stewardship Council

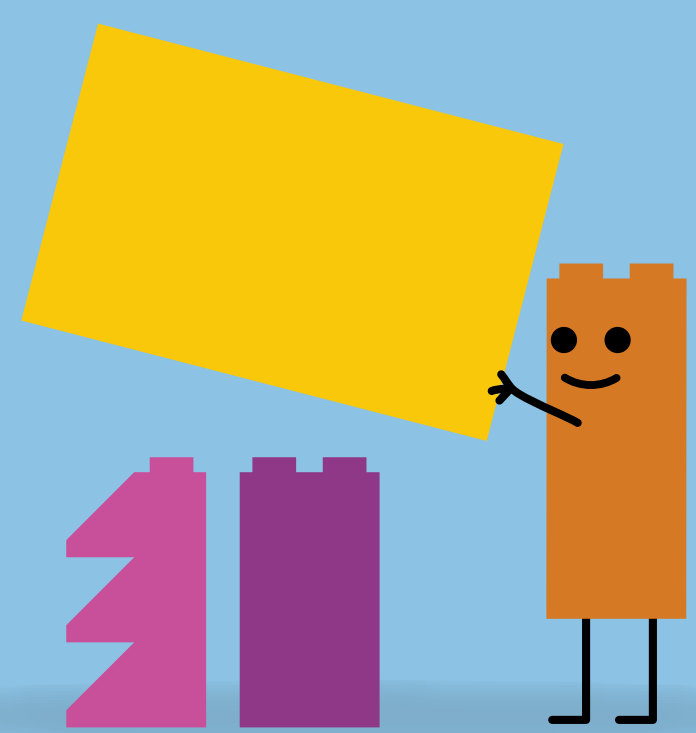

Tested by **hundreds** of parents and children

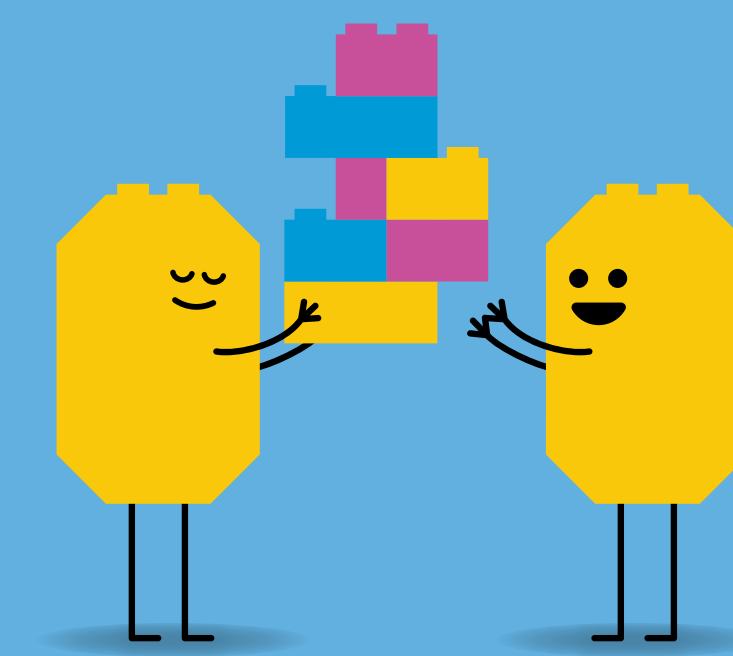

**15** different prototypes developed

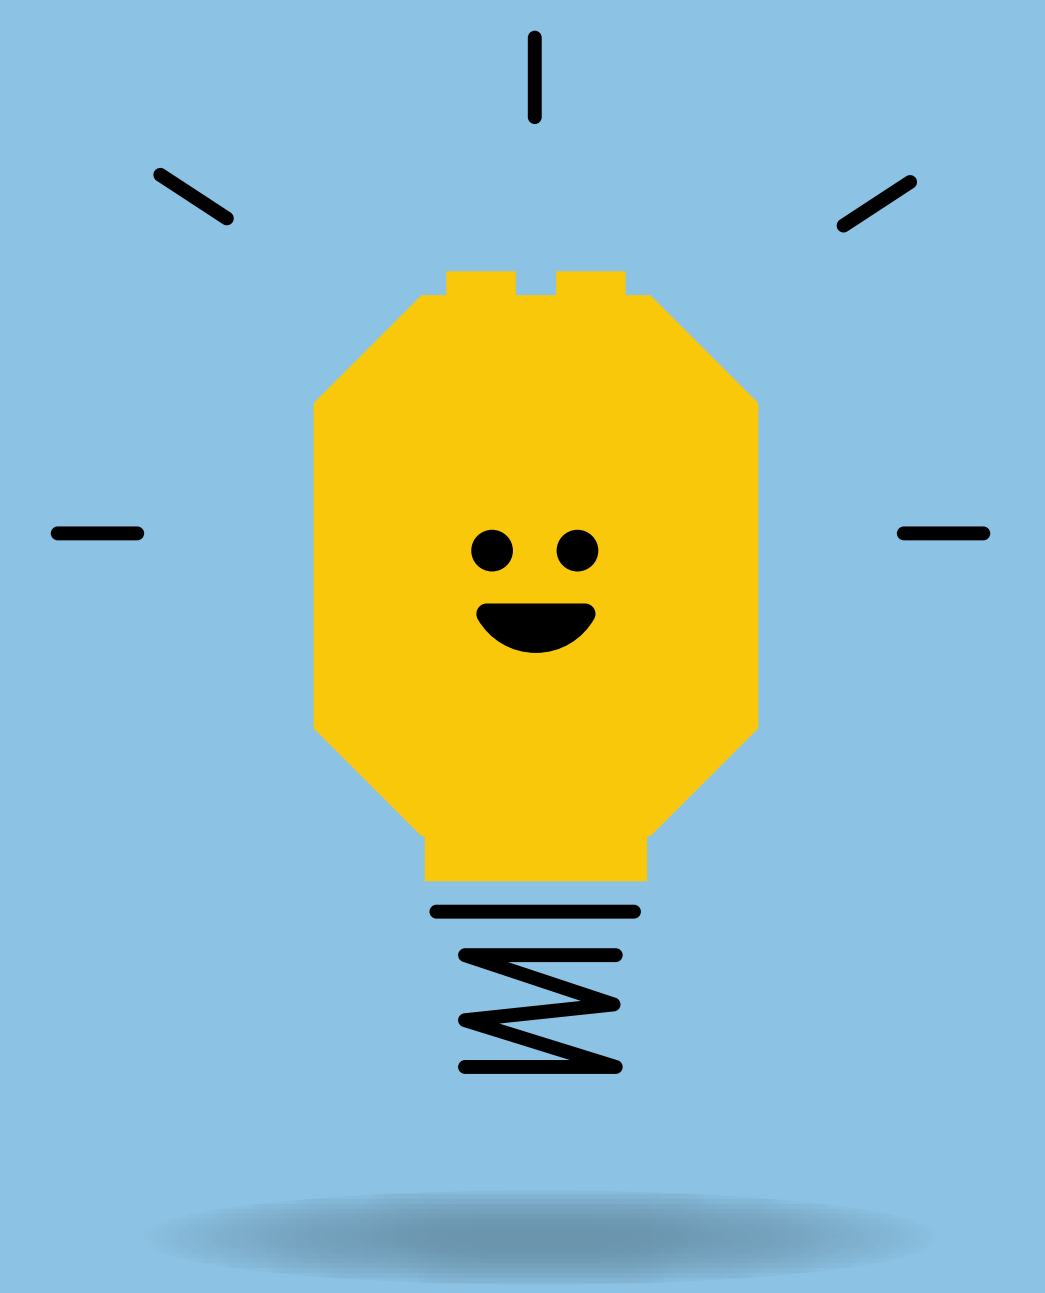

Easy to **recycle**

Easier to **open**

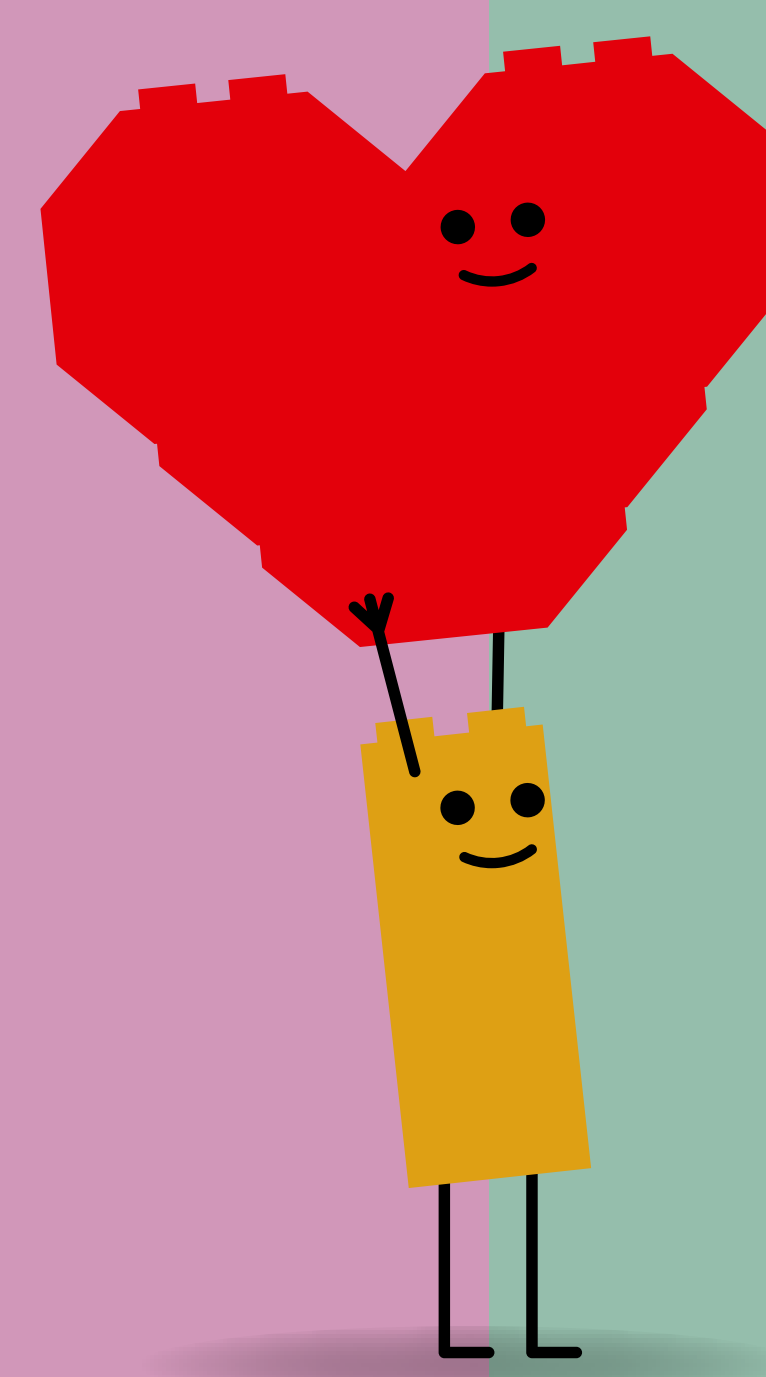

In development for the past **two years**

**“We receive lots of letters from children asking why we still use single-use plastic in our boxes, which inspired us to begin to make this change. This is part of our ambition to make all our packaging sustainable by the end of 2025.”**

**Tim Brooks, Vice President of Environmental Responsibility at the LEGO Group**

This forms part of an investment of up to **US\$400 million over three years** from the LEGO Group to accelerate its sustainability efforts. And build a better planet for all.
